## Introduction

Fast and Easy is a Portuguese company that operates in Industrial Automation area, providing equipment and integrated solutions in order to modify the employment outlook of companies, creating and developing solutions that enable our customers to increase productivity and the improvement of work conditions.

To take this mission forward, we have studied and dedicate ourselves to obtaining the best solutions for the various models of production and organization.

As a business project, we are concerned with the enti-

re system, offering solutions designed and developed based on analysis of customer needs.

The total technical assistance of Fast and Easy guarantees the proper functioning of all systems installed. The expertise and relationship with our customers, partners and suppliers are our success.

As suppliers of equipment and solutions for industrial projects with exacting and high quality standards, we pay attention to market trends, needs and offerings, seeking always updating our range of services, and the success of our implementations is a cause of satisfaction and pride.

The customer has always a major role throughout the implementation process of our projects, so that we can guarantee, as a result of this teamwork, high satisfaction and full efficiency and effectiveness levels.

## Training

With extensive experience in training, Fast and Easy minister training on Industrial Automation and Instrumentation in any location / country. The activities are tailored to client needs (beyond the existing models the client can request a specific program that will bridge the gaps he detects).

There are initial, medium and advanced levels, we can provide all the equipment necessary for a strong practical or use customer equipment, which will allow a better integration of the learner to assimilate the content.

## Projects and Services

Fast and Easy develops and implements, on the ground, products suited to your needs, both in terms of software and / or hardware.

Some **industrial areas** in which we intervene:

**Industrial Automation**  
Software (PLC/HMI/SCADA/BD/RPT7etc.)  
Metalworking  
Pneumatic  
Electricity

**Power and Automation**  
**Electrical Boards**  
**Water Treatment Systems**

**Remote Management and Supervision Systems**

**Preparation of projects in 3D**

**Food Industry**  
**Environmental Industry**  
**Automotive Industry**  
**Footwear Industry**  
**Electronics Industry**  
**Renewable Energy**  
**Graphic Industry**  
**Hydraulic Industry**  
**Metalworking Industry**  
**Water Production**  
**Chemistry Industry**  
**Health Industry**  
**Textile Industry**
